

Franklin Square Elementary School

Franklin Square Elementary School (FSES) is the newest elementary school in the Greater Clark County School Corporation. It is located in downtown Jeffersonville, Indiana and houses students in prekindergarten through fifth grade. Approximately 343 students are enrolled in this new educational academy. The mission of FSES is to prepare students for lifelong success. Our vision is to be the foundation of educational excellence in the heart of downtown Jeffersonville, Indiana. With both students and staff using research based educational curriculum and technology on a daily basis FSES will ensure that all students acquire the skills needed to be lifelong learners.

We will incorporate Project Base Learning and introducing STEAM (Science, Technology, Engineering, the Arts and Mathematics) to the students so they may embrace and experience education in a way that mirrors real life. Students in grades 3-5 will have 1:1 device while primary students will have technology devices in the classroom. Special area programs include Art, Music, Physical Education, Library, Coding and Project Lead the Way.

Developing a welcoming safe classroom community while establishing daily routines will encourage positive student-teacher relationship. Developing excellent character in our students is reinforced through GCCS's P.R.1.D.E. program which encourages: Persistence. Respectfulness. Initiative. Dependability and Efficiency. Daily morning meetings also help students to grow socially and emotionally.

At FSES we value the partnership with parents and community members to educate our children. If you have any questions, feel free to call us at 812-288-4874.
